

GenieColor Mycoplasma Detection Kit

Visual Mycoplasma Detection

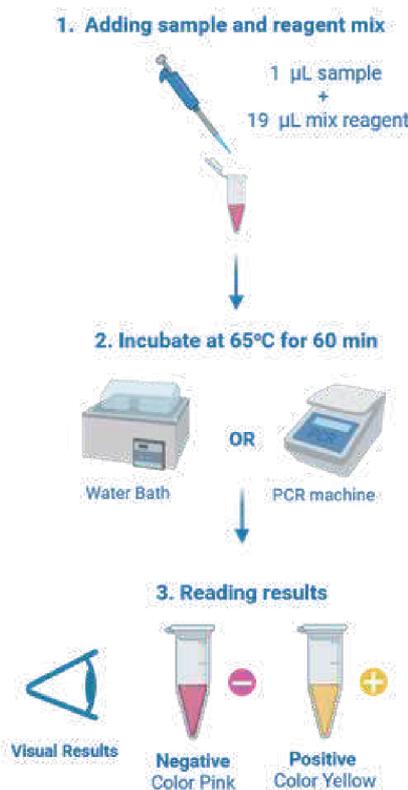

Fig.1: GenieColor Mycoplasma Detection Kit workflow and results interpretation. If mycoplasma DNA is present, the reagent color changes from pink to yellow.

Excellent Performance

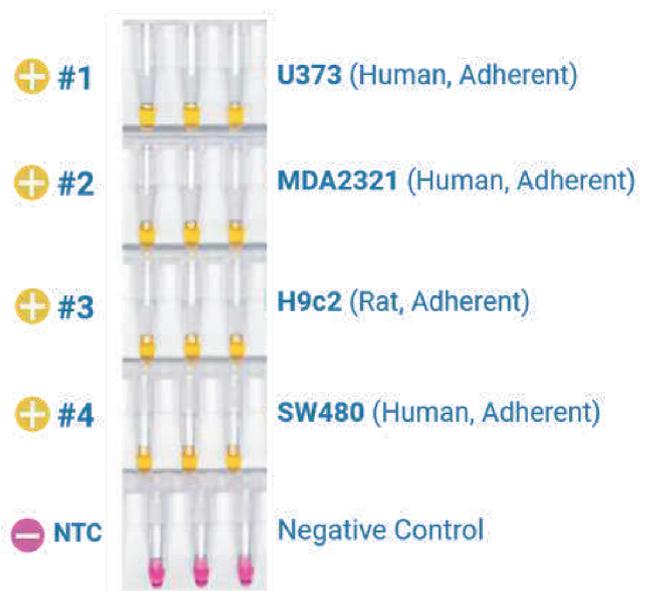

Fig.2: A selection of common cell lines was tested with GenieColor Mycoplasma Detection Kit. Results showed great compatibility with all tested cell lines.

GenieColor Mycoplasma Detection Kit

Detect Mycoplasma by eye

VISUAL

Identify mycoplasma contamination with a pink-to-yellow color change

20% OFF
GEN2614

RAPID

1-step protocol, 60 minute assay with no special instruments

VALIDATED

Detect up to 40 mycoplasma species

SENSITIVE

Detect > 100 mycoplasma plasmid copies/ μ l in 1 μ l of cell culture supernatant, serum or media

CODE	PRODUCT	PACK SIZE
MORV0013-25	GenieColor Mycoplasma Detection Kit	25 test
MORV0013-50	GenieColor Mycoplasma Detection Kit	50 test
